Subject: CAtford Dog Track Redevelopment

I am writing to set out my concerns about the lack of infrastructure to support the proposed housing development.

I completely understand the importance of providing housing but am particularly concerned about the increased pressure on school places. Given the well publicised shortage of school places in the borough and the significant additional development proposed why doesn't the proposal set out plans for a new school.

I am also very concerned about the impact of the building works on local noise and air pollution particularly when combined with the proposed expansion of Holbeach Primary School.

I Hope you will take these points into consideration.
