

## **Lewisham Site Allocations Local Plan – additional Inspector’s query**

### **Sites of Interest for Nature Conservation**

To understand the points being made by representors concerning SINC’s I would be grateful for clarification of these two points:

1 Part 2 of the SALP has a schedule identifying changes to the SINC’s. I find it difficult to cross-reference this to the sites currently recognised in the development plan which I take to be those named in table OS4 of the UDP. In comparison with table OS4, SALP (a) uses a different numbering system and (b) possibly changes the terminology used to classify sites in UDP table OS4 which refers to sites of metropolitan importance, borough importance Grades 1 and 2, and local importance. Could it therefore be clarified what the list in the development plan would be if the changes proposed in the SALP were to be made to it.

2 The policies applying to SINC’s were previously clearly identified under UDP policies OS12 and OS13. These have now been removed from the development plan following adoption of the Core Strategy. What are the policies which now relate to SINC’s? If, looking at CS policy 12(2) (f), they are considered to be found in national and London policies, could relevant extracts please be provided.

3 Is a copy of the GLA survey of February 2006 available?

Roy Foster  
Inspector
