- Historical Flooding
- ▲ Groundwater Flood Incidents

**No of Properties Flooded by Sewers (see note) in the last 10 years**

- 0
- 1 - 10
- > 10

**Sewer Flooding**  
 In order to fulfil statutory commitments set by OFWAT, water companies must maintain verifiable records of sewer flooding. The register of sewer flooding is referred to as the DG5 register. DG5 register internal flooding is defined as flooding which enters a building or passes below a suspended floor; whilst external flooding is defined as flooding which is not classed as internal.

**Historical Flooding**  
 This information is provided by the Environment Agency and shows the combined extents of known flooding from rivers, the sea and groundwater.
